Hi all,

Please review release #39 for approval. Please note that this update's main purpose is to notify and set expectations for stakeholders that UC will only be issuing additional releases as the current situation warrants and/or new public information is readied for distribution (road openings, etc.).

Thus, we've created what will be known publically as the Port Neches Response Current Situational Update, which will be housed at a static URL link on the response web site, and only updated as needed for full situational awareness background. Nothing has been changed in this document from the last few releases, with the exception of the emphasis on STAN registration. The numbering of these documents will only be internal for response document retention purposes.

Thanks,  
Ana.

**Anastasia Watkinson**
